FEDERAL LEGISLATION

The [Alyce Spotted Bear and Walter Soboleff Commission on Native Children Act](#) (S. 246) authorizes the establishment of a national commission that would study a broad range of issues affecting AI/AN children and families. Senator Heitkamp (D-ND) is the original co-sponsor. The bill has been reported out of committee and is now awaiting consideration by the full Senate. At a hearing in 2014, former Senator Byron Dorgan gave his support to the legislation, noting it is time that attention be brought to the challenges faced by AI/AN children, and that we work together to find solutions. Several members of SCIA also support this legislation. NICWA has endorsed this legislation and is working with Senator Heitkamp to address some concerns within the bill. This bill was approved by the Senate committee and is now awaiting consideration by the full Senate.

The [Native American Children's Safety Act](#) (S. 184 and H.R. 1168) establishes new mandates for tribal licensing of foster care and adoptive homes. The original co-sponsor of the Senate legislation is Senator Hoeven (R-ND), and the House bill co-sponsor is Representative Kevin Cramer (R-ND). The Senate and House bills have been reported out of their committees and are now awaiting consideration by the full Senate and House. Both the House and Senate bills have cleared their committees and are now awaiting consideration by the full House and Senate.

[Senator Wyden Solicits Comments on Child Welfare Reform Proposal](#) to expand reimbursement under the title IV-E program to allow for funding of in-home and other types of prevention services that can keep children safely in their homes without having to remove them. This proposal would also provide approximately \$470 million to the title IV-B Promoting Safe and Stable Families program. The expansion of funding and services to help reduce the number of children in foster care is similar to a FY2016 budget proposal from President Obama and is widely viewed as necessary to bring balance into the child welfare system, which has far more funding for services that require a child be removed from the home before

receiving reimbursement for services. Tribes are eligible to operate both the title IV-E and Title IV-B programs and are encouraged to carefully study Senator Wyden's proposal. Senator Wyden is asking for comments on his proposal by June 12, 2016.

[FY 2016 Land Buy-Back Program for Tribal Nations](#)

Deadline: September 30, 2016

The Secretary of the Interior established the Land Buy-Back Program for Tribal Nations (Buy-Back Program, Program) to implement the land consolidation provisions of the Cobell Settlement Agreement, which provided \$1.9 billion to consolidate fractional land interests across Indian country. The Buy-Back Program allows interested individual owners to sell their land for immediate transfer to the recognized tribe that exercises jurisdiction. This effort will strengthen tribal sovereignty and put decision-making in the hands of the tribal government, freeing up resources that have been locked-up as land interests that have fractionated over time. The Buy-Back Program has announced 42 locations where land consolidation activities such as planning, outreach, mapping, mineral evaluations, appraisals or acquisitions are scheduled to take place through the middle of 2017. The Buy-Back Program is interested in partnering with the eligible tribes that have jurisdiction over these 42 locations, as well as any locations that are added to the implementation schedule, to gain their direct participation in land consolidation efforts given tribes' unique qualifications to perform land consolidation activities for their reservations. Consequently, the Program intends to, whenever feasible and practical, enter into single source cooperative agreements with these eligible tribes to not only capitalize on their unique knowledge of their reservations but also to improve the overall effectiveness and efficiency of the Program. Eligible tribes will be given the opportunity to apply for a cooperative agreement, whenever feasible and practical, prior to the implementation of the Buy-Back Program at the location under their jurisdiction. The Buy-Back Program will continue to expand to other reservations over the next several years, and tribes with jurisdiction over locations not yet scheduled for implementation will receive information about how they can participate once their reservations are scheduled. Tribes are encouraged to contact Program staff for more information on developing the cooperative agreement application prior to submission. Tribes are not required to enter into cooperative agreements to participate in the Program.

[Exploratory Clinical Trials of Novel Interventions for Mental Disorders \(R61/R33\)](#)

Deadline: October 14, 2016

The purpose of this Funding Opportunity Announcement (FOA) is to support the efficient pilot testing of novel interventions for mental disorders in adults and children through an experimental therapeutics approach. Under this FOA, trials must be designed so that results, whether positive or negative, will provide information of high scientific utility and will support go/no-go decisions about further development or testing of the intervention. Studies of novel interventions include, but are not limited to behavioral, pharmacological, biologics-based, cognitive, device-based, interpersonal, physiological, or combined approaches. Support will be provided for up to two years (R61 phase) for preliminary milestone-driven testing of the interventions engagement of the therapeutic target, possibly followed by up to 3 years of support (R33 phase) for studies to replicate target engagement and relate change in the intervention target to functional or clinical effects. Ultimately, this R61/R33 FOA is intended to speed the translation of emerging basic science findings of mechanisms and processes underlying mental disorders into novel

interventions that can be efficiently tested for their promise in restoring function and reducing symptoms for those living with mental disorders.

Deadline: Open

This Funding Opportunity Announcement (FOA) seeks to encourage applications that employ innovative research to identify mechanisms of influence and/or promote positive sustainable health behavior(s) in children and youth (birth to age 21). Given the many factors involved in developing sustainable health behaviors, applications from multidisciplinary teams are strongly encouraged. The ultimate goal of this FOA is to promote research that identifies and enhances processes that promote sustainable positive behavior or changes social and cultural norms that influence health and future health behaviors.

[Integrated Food Defense](#)

Deadline: Open applications until April 2, 2019

The Integrated Food Defense & Emergency Response Cooperative Agreement Program (IFD&ER CAP) grant awards are designed to generate food defense tools and resources that are easily replicated and can complement, aid in the development of, and/or improve State, local, Tribal and territorial (SLTT) food defense programs through unique, innovative, and reproducible projects. The known overlap between food safety (unintentional contamination) and food defense (intentional contamination) is extensive. And the pools of resources available are vast and sometimes difficult to locate and implement. As the Food Safety Modernization Act (FSMA) recognizes the evolution of the relationship between food safety and food defense, it is critical that these programs be integrated to the maximum extent possible in order to ensure the most efficient use of resources, as well as to optimize responses to incidents and events.

[Interventions for Health Promotion and Disease Prevention in Native American Populations](#)

Deadline: Open

The purpose of this funding opportunity announcement (FOA) is to develop, adapt, and test the effectiveness of health promotion and disease prevention interventions in Native American (NA) populations. NA populations are exposed to considerable risk factors that significantly increase their

The intervention program should be culturally appropriate and promote the adoption of healthy lifestyles, improve behaviors and social conditions and/or improve environmental conditions related to chronic diseases, the consumption of tobacco, alcohol and other drugs, mental illness, oral disease, or HIV-infection. The intervention program should be designed so that it could be sustained within the entire community within existing resources, and, if successful, disseminated in other Native American communities. The long-term goal of this FOA is to reduce mortality and morbidity in NA communities.
