Re: Actuarial Review of the Self-Funded Workers' Compensation Program

Dear Mr. Farrales:

We have completed our review of the Judicial Council of California (the Judicial Council), Judicial Branch Workers' Compensation Program (JBWCP). Specifically, the scope of this review includes providing the following information for the program:

- Estimated outstanding liabilities for loss and allocated loss adjustment expenses (ALAE) as of June 30, 2021. Estimates are provided at the expected level, as well as various confidence levels.
- Projection of ultimate loss and ALAE for fiscal accident years 2020-21 through 2023-24. Estimates are provided at the expected level, as well as various confidence levels.
- Projection of loss and ALAE payments for fiscal years 2020-21 through 2023-24.

The JBWCP is analyzed in two parts: (1) Trial Courts and (2) State Judiciary (including Trial Court Judges).

The estimates contained in this report are based upon loss data valued as of December 31, 2020, as well as other information provided by the Judicial Council, including exposure and financial data. Our estimates include medical and indemnity benefits, allocated loss adjustment expenses (ALAE), unallocated loss adjustment expenses (ULAE), and benefit payments made under the provisions of labor code 4850. Our estimates exclude all other program expenses. Furthermore, the estimates in this report are not discounted for anticipated investment income.

ALAE is the direct cost associated with the defense of individual claims (e.g. legal fees, investigation fees, court charges). ULAE is the cost to administer all claims to final settlement, which may be years into the future (e.g. claims adjusters' salaries, taxes). Other program expenses may include excess insurance, brokerage, consulting, and administrative expenses.

Our conclusions regarding the JBWCP's liability for unpaid loss and allocated loss adjustment expenses (ALAE) at June 30, 2021 are summarized in the table below at the expected level, as well as various confidence levels.

90% CL	83,912,000	5,947,000	89,859,000

The \$71,444,000 estimate is the minimum liability to be booked by the Judicial Council at June 30, 2021 for its workers' compensation program, in accordance with Governmental Accounting Standards Board (GASB) Statement #10. GASB #10 requires the Judicial Council to accrue a liability on its financial statements for the ultimate cost of claims and expenses associated with all reported and unreported claims, including ALAE and ULAE. GASB #10 does not prohibit the discounting of losses to recognize investment income. GASB #10 does not address an asset requirement for the program, but only speaks to the liability to be recorded on the Judicial Council's financial statements.

Because actuarial estimates of claims costs are subject to some uncertainty, we recommend that an amount in addition to the undiscounted expected loss costs be set aside as a margin for contingencies. Generally, the amount should be sufficient to bring funding to the 75% to 85% confidence level for primary programs. We consider funding to the 70% confidence level to be marginally acceptable and funding to the 90% confidence level to be conservative.

It should be noted that the Trial Courts have an additional contingent liability for claims occurring from January 1, 2001 through June 30, 2003. These are referred to as Trial Courts Group II claims. Because the claims data is not available, we estimated the liability for unpaid losses by using payroll and self-funded retention information for this period, and applying loss development and payments patterns for the Trial Courts Group I. For these claims, we estimate the expected liability for unpaid loss and allocated loss adjustment expenses (ALAE) at June 30, 2021 to be \$57,771.

The table below shows our estimates of projected ultimate loss and ALAE for the JBWCP for the 2020-21 through 2023-24 fiscal years.

The loss projections in this report reflect the estimated impact of benefit legislation contained in AB749, AB227, SB228, SB899, SB863, and recent WCAB court decisions based upon information provided by the WCIRB.

**DRAFT**

The ultimate impact on loss costs of legislated benefit adjustments are generally difficult to forecast in advance because the changes typically take place over a period of several years following enactment. Furthermore, actuarially derived benefit level evaluations often underestimate actual future cost levels. The shortfalls result from a variety of circumstances, including: increases in utilization levels, unanticipated changes in administrative procedures, and cost shifting among benefit categories. Thus, actual cost increases could differ, perhaps substantially, from the WCIRB's estimates.

Please note, the estimates included in this report include a provision for the potential increased cost of workers' compensation claims as a result of the coronavirus (COVID-19) pandemic.

The report that follows outlines the scope of our study, its background, and our conclusions, recommendations, and assumptions. Judgments regarding the appropriateness of our conclusions and recommendations should be made only after studying the report in its entirety, including the graphs, attachments, exhibits and appendices. Our report has been developed for the Judicial Council's internal use. It is not intended for general circulation.

We appreciate the opportunity to be of service the Judicial Council of California in preparing this report. Please feel free to call Mike Harrington at (916) 244-1162 or Becky Richard at (916) 244-1183 with any questions you may have concerning this report.

## **I. BACKGROUND**

The Judicial Council of California the policymaking body of the California courts, the largest court system in the nation. Under the leadership of the Chief Justice and in accordance with the California Constitution, the Judicial Council is responsible for ensuring the consistent, independent, impartial, and accessible administration of justice. The Judicial Council's staff agency and is responsible for implementing council policies.

The Judicial Council self-funds its exposure for workers' compensation claims, with the program being administered by the Judicial Council. The self-funded workers' compensation program is referred to as the Judicial Branch Workers' Compensation Program. Claims administration services are provided by AIMS.

The JBWCP is a self-funded program in which each entity pays a share of cost based on each member's workers' compensation claims experience and historical payroll. The total cost for this program is broken up into three groups: 1) Trial Court employees and volunteers, which includes the membership of 57 out of the 58 California Trial Courts, 2) Judicial, which includes member coverage for the Appellate Justices, Trial Court Judges, and Retired Judges in the Assigned Judges Program, and 3) State Judiciary, which includes the membership of the Supreme Court, Courts of Appeal, Habeas Corpus Resource Center, California Judicial Center Library, Commission on Judicial Performance, and the Judicial Council and provides coverage for all of their employees and volunteers.

Given the low volume of loss experience and exposure, and in order to provide a credible actuarial estimate, the Judicial and the State Judiciary groups are valued together for purposes of determining total program cost. Thus for the purpose of the analysis, the three groups are consolidated to two groups, Trial Courts and the State Judiciary.

Beginning January 1, 2003, the JBWCP assumed liability for the Trial Court's workers' compensation claims for those members who joined the program retroactive to January 1, 2001. As of December 31, 2020, 57 of the 58 trial courts in California have joined the program; only Los Angeles does not participate in the program. The current self-funded retention is \$2,000,000 per occurrence for both the Trial Courts and the State Judiciary.

The purpose of this review is to provide a guide to the Judicial Council to determine reasonable funding levels for its self-insurance program according to the funding policy the Judicial Council has adopted and to comply with Governmental Accounting Standards Board Statements #10 and #30. The specific objectives of the study are to estimate the JBWCP's liability for outstanding claims as of June 30, 2021, project ultimate loss costs for 2020-21, 2021-22, 2022-23, and 2023-24, and provide funding guidelines to meet these liabilities and future costs.

## **II. CONCLUSIONS AND RECOMMENDATIONS**

### **A. LIABILITY FOR OUTSTANDING CLAIMS**

Graph 1 on the following page summarizes our assessment of the JBWCP's funding position as of June 30, 2021. The dark-colored bars indicate our estimates of the program's liability for outstanding claims before recognition of the investment income that can be earned on the assets held before the claim payments come due.

Our best estimate of the full value of the JBWCP's liability for outstanding claims within its self-funded retention is \$71,444,000 as of June 30, 2021. This amount includes losses, allocated loss adjustment expenses (ALAE), unallocated loss adjustment expenses (ULAE), and payments for 4850 benefits. This amount excludes all other program expenses. Furthermore, the estimates in this report are not discounted for anticipated investment income.

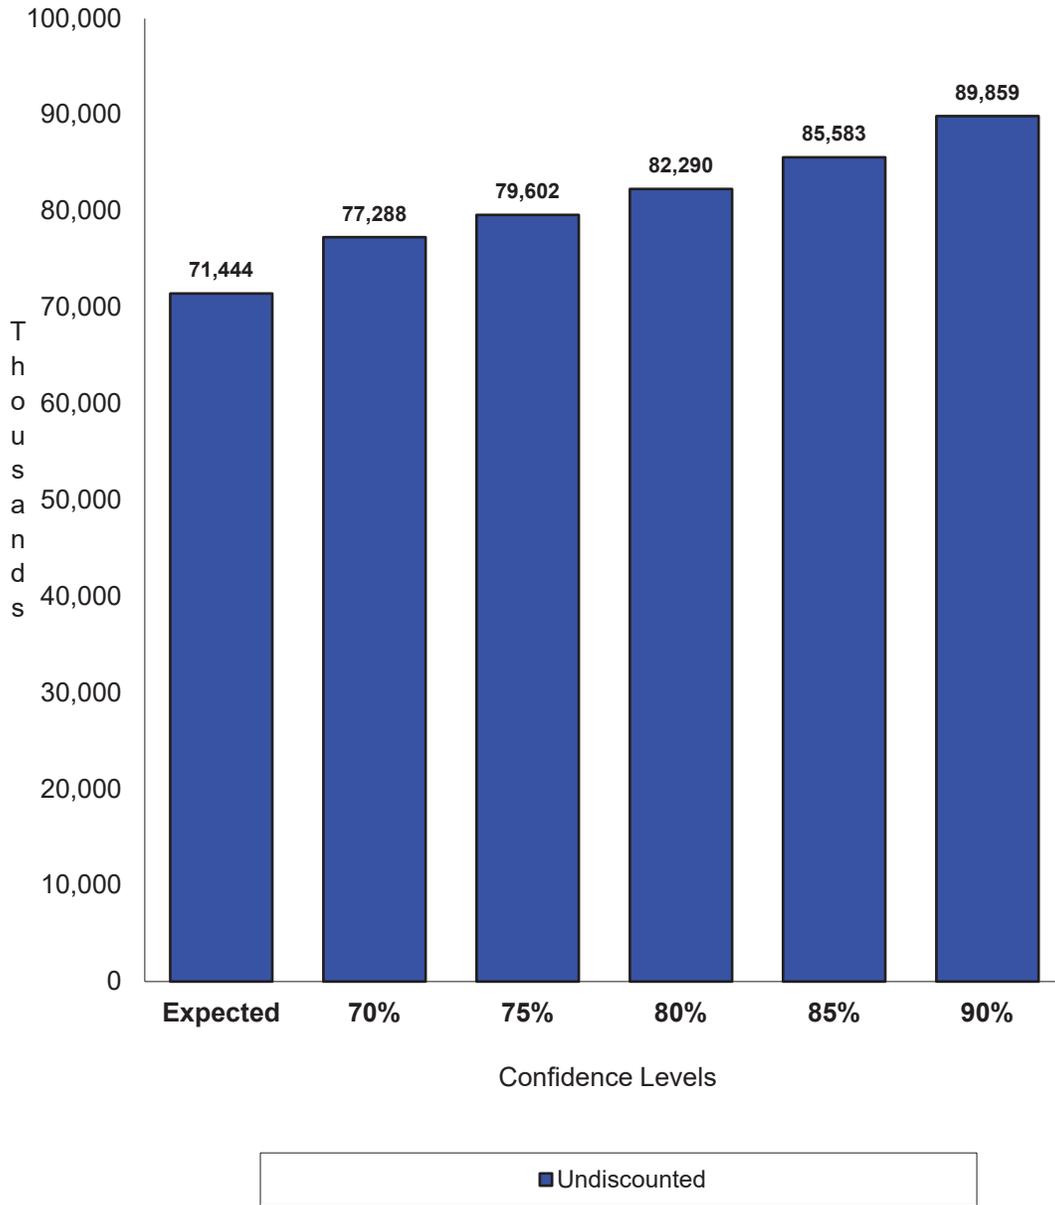

ALAE is the direct cost associated with the defense of individual claims (e.g. legal fees, investigation fees, court charges). ULAE is the cost to administer all claims to final settlement, which may be years into the future (e.g. claims adjusters' salaries, taxes). Other program expenses may include excess insurance, brokerage, consulting, and administrative expenses.

There is some uncertainty associated with our best estimate because of the random nature of much of the process that determines ultimate claims costs. For this reason, we generally recommend that a program such as this include some funding margin for the possibility that actual loss costs will be greater than the best estimate.

We generally measure the amount of this margin by thinking in terms of the probability distribution of actual possible results around our best estimate. As the margin grows, the probability that the corresponding funding amount will be sufficient to meet actual claim liabilities increases. We typically refer to this probability as the "confidence level" of funding.

Graph 1 shows the liabilities for outstanding claims at several confidence levels that are typically of interest to risk managers in formulating funding policies for self-insurance programs.

The case reserve is the amount left to be paid on a claim, as estimated by the claims administrator. The IBNR reserve is the ultimate value of losses, less any amount that has been set up as reported losses by the claims adjuster. It includes both amounts for claims incurred but not yet received by the administrator and loss development on already reported claims.

## **B. PROGRAM FUNDING: GOALS AND OBJECTIVES**

As self-insurance programs have proliferated among public entities, it has become apparent that there is a large measure of inconsistency in the way in which these programs recognize and account for their claims costs. This is the result of the fact that there have been several different sources of guidance available, none of which has been completely relevant to public entity self-insurance programs.

According to the Governmental Accounting Standards Board (GASB), the most relevant source of guidance on the subject is Financial Accounting Standards Board Statement #60. A liability for unpaid claim costs, including all loss adjustment expenses, should be accrued at the time the self-funded events occur. This liability should include an allowance for incurred but not reported claims. It may be discounted for investment income at an appropriate rate of return, provided the discounting is disclosed. The regulations detailing the way in which this must be done are outlined in GASB's statements #10 and #30. These regulations are required to be applied by the Judicial Council.

GASB #10 and #30 do not address funding requirements. They do, however, allow a range of funded amounts to be recognized for accounting purposes; specifically, GASB #10 and #30 which allow recognition of a funding margin for unexpectedly adverse loss experience. Thus, for accounting purposes, it is possible to formulate a funding policy from a range of alternatives. The uncertainty in any estimate of the program's liability for outstanding claims should be taken into consideration in determining funding policy, but it may be offset by recognizing anticipated investment income earnings. This usually means developing a funding program based on discounted claims costs with some margin for unexpected adverse loss experience.

The amount of the margin should be a question of long-term funding policy. We recommend that the margin be determined by thinking in terms of the probability that a given level of funding will prove to be adequate. For example, a reasonable goal might be to maintain a fund at the 85% confidence level.

A key factor to consider in determining funding policy is the degree to which stability is required in the level of contributions to the program from year to year. If you elect to fund at a low confidence level, the chances are much greater that future events will prove that additional contributions should have been made for current claims. The additional contributions for years by that time long past may be required at the same time that costs are increasing dramatically on then-current claims. The burden of funding increases on past years as well as on current years, may well be prohibitive.

We generally recommend maintaining program funding at the 80% confidence level, after recognition of investment income, with a recommended range of the 75% to 85% confidence levels. We tend to think of the 70% confidence level as marginally acceptable and of the 90% confidence level as conservative. We recommend the 75% to 85% confidence level range because the probabilities are reasonably high that resulting funding will be sufficient to meet claim liabilities, yet the required margins are not so large that they will cause most self-funded entities to experience undue financial hardship. In addition, within this range, anticipated investment income generally offsets the required margin for the most part, which means that it is also reasonable to think of the liabilities as being stated on an undiscounted basis.

We also strongly believe, however, that the confidence level to which any future year is funded should be evaluated in light of the relative certainty of the assumptions underlying the actuarial analysis, the Judicial Council's other budgetary constraints, and the relative level of risk it is believed appropriate to assume. This means formulating both short and long-term funding goals, which may be the same in some years, but different in others.

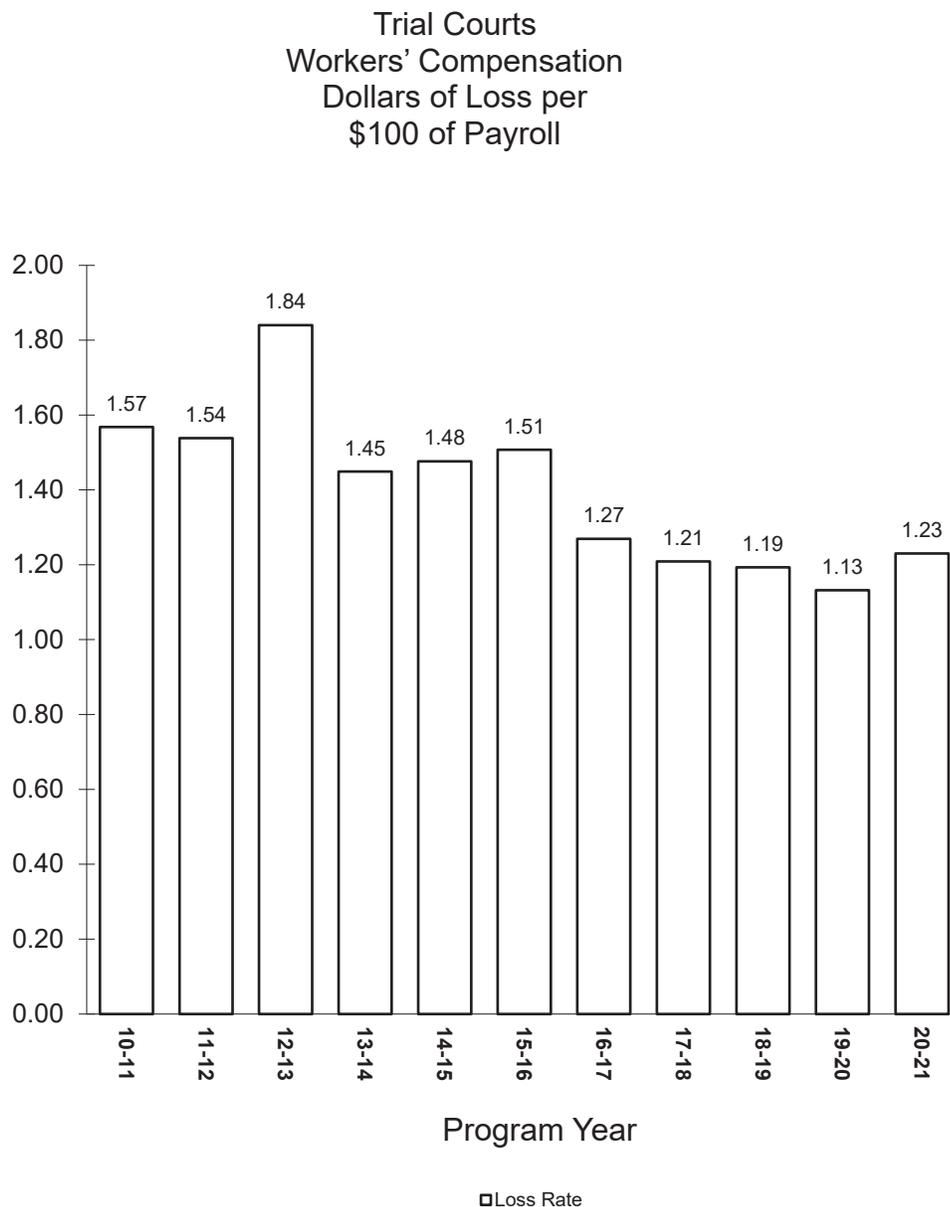

In general, we recommend that you fund each year's claims costs in that year. When surpluses or deficiencies have developed on outstanding liabilities and funding adjustments are necessary, they should be clearly identified as such so that the habit of funding each year's claims costs that year is maintained. We also recommend that you reduce surplus funding more slowly than you would accumulate funding to make up a deficiency.

### C. HISTORICAL TRENDS IN THE SELF-INSURANCE PROGRAM

Graphs 2, 3 and 4 below delineate the average loss rate, severity and frequency, respectively for the Trial Courts. Note that for the purposes of these graphs, all individual losses have been limited to \$250,000.

The Trial Courts' loss rate (limited to \$250,000 per occurrence) has been relatively stable overall during the past ten years. The Trial Courts' loss rate averaged \$1.56 during the 2010-11 and 2015-16 program years and averaged \$1.20 per \$100 of payroll during 2016-17 through 2019-20. Our projected loss rate for 2020-21 is \$1.23 per \$100 of payroll. This selection is based on the Trial Courts' average for the most recent four years.

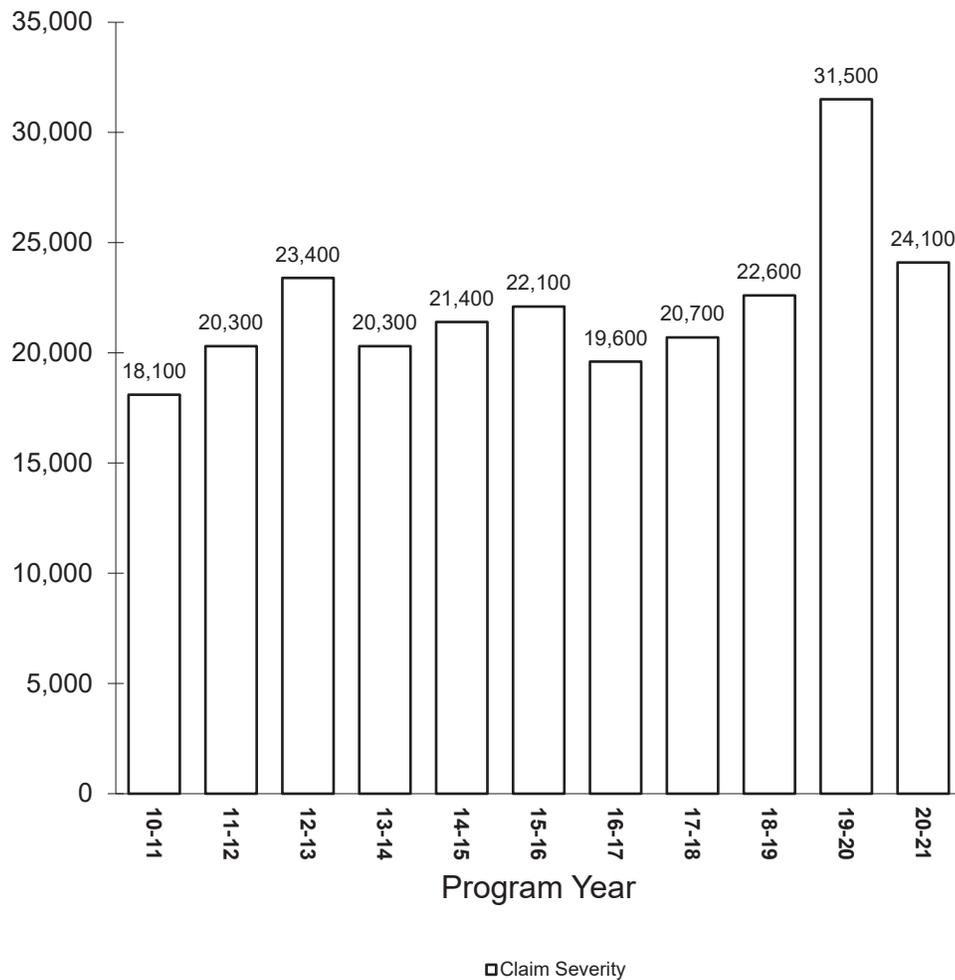

Graph 2

The Trial Courts' claim severity, or cost per claim (limited to \$250,000 per occurrence), has been rising overall during the past ten years. The projected 2020-21 average cost per claim of \$24,100 is based on the recent increasing trend. The large increase in 2019-20 is lower claim counts due to the COVID-19 pandemic.

Graph 3

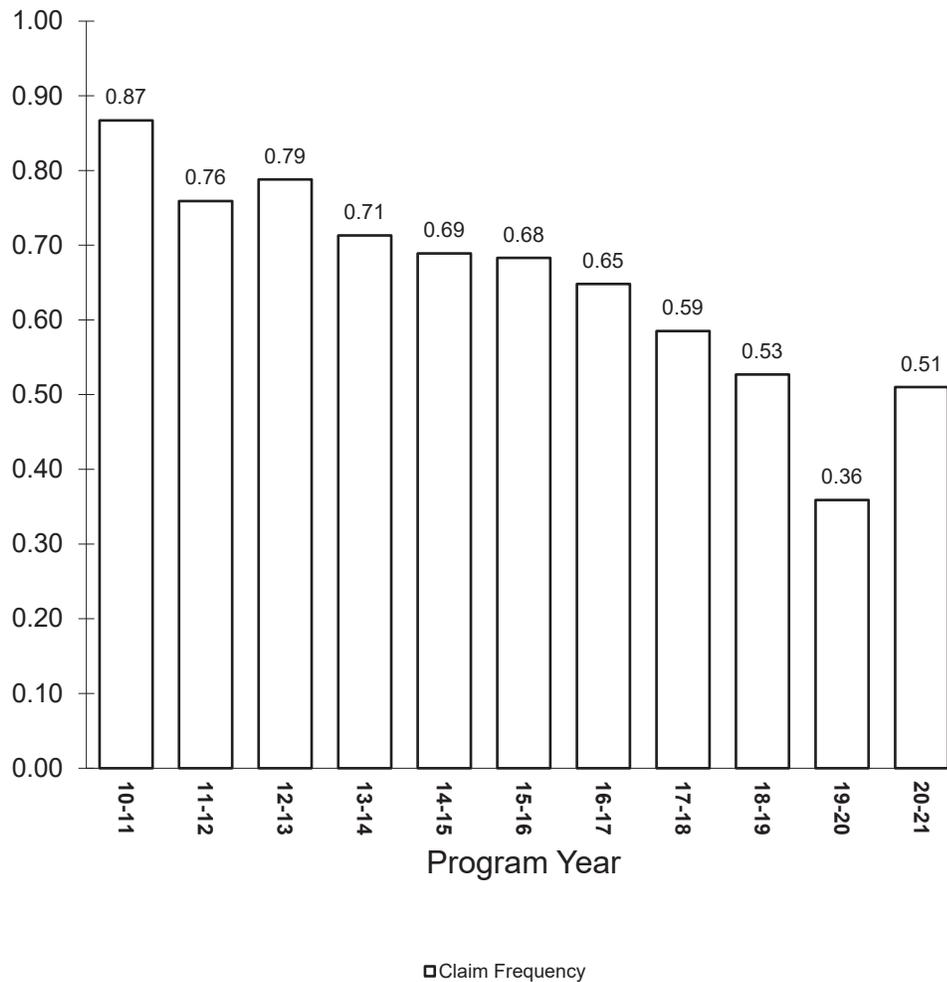

Trial Courts  
Workers' Compensation  
Dollars of Loss per Claim

The Trial Courts' claim frequency, or number of claims per \$1 million of payroll, has been generally decreasing since 2010-11. Our projected claims frequency of 0.51 for 2020-21 is similar to the average of the recent four years and the apparent downward trend. The drop in 2019-20 is due to the COVID-19 pandemic.

Graph 4

Graphs 5, 6 and 7 below delineate the average loss rate, severity and frequency, respectively for the State Judiciary. Note that for the purposes of these graphs, all individual losses have been limited to \$100,000.

The State Judiciary's loss rate (limited to \$100,000 per occurrence) has been quite volatile over the past ten years. The State Judiciary's loss rate averaged \$0.070 from 2010-11 to 2015-16 and \$0.050 between 2016-17 and 2019-20. Our projected loss rate for 2020-21 is \$0.055 per \$100 of payroll, which is similar to the average of the last four years.

Graph 5

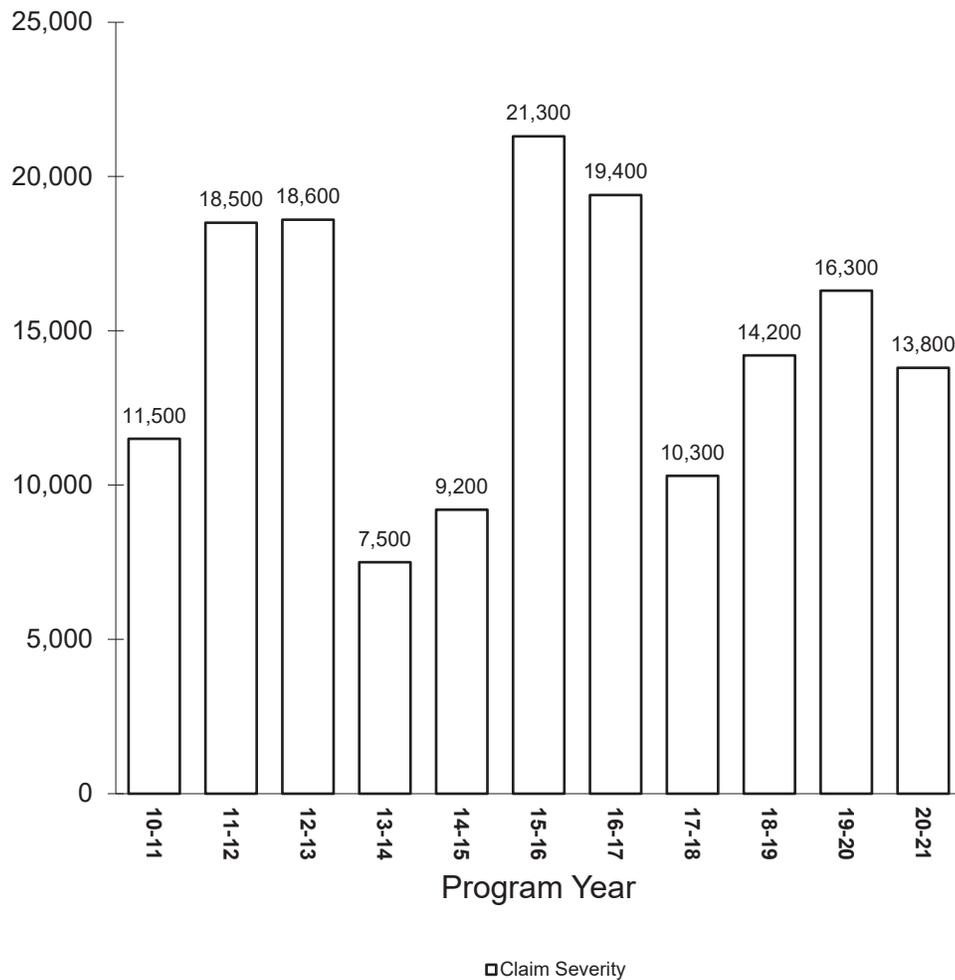

Judiciary  
Workers' Compensation  
Dollars of Loss per  
\$100 of Payroll

The State Judiciary's claim severity, or cost per claim (limited to \$100,000 per occurrence), fell to a low of \$7,500 during 2013-14. Since that time the average claim severity has increased overall. Our projection of \$13,800 for 2020-21 is based on the recent years and apparent upward trend.

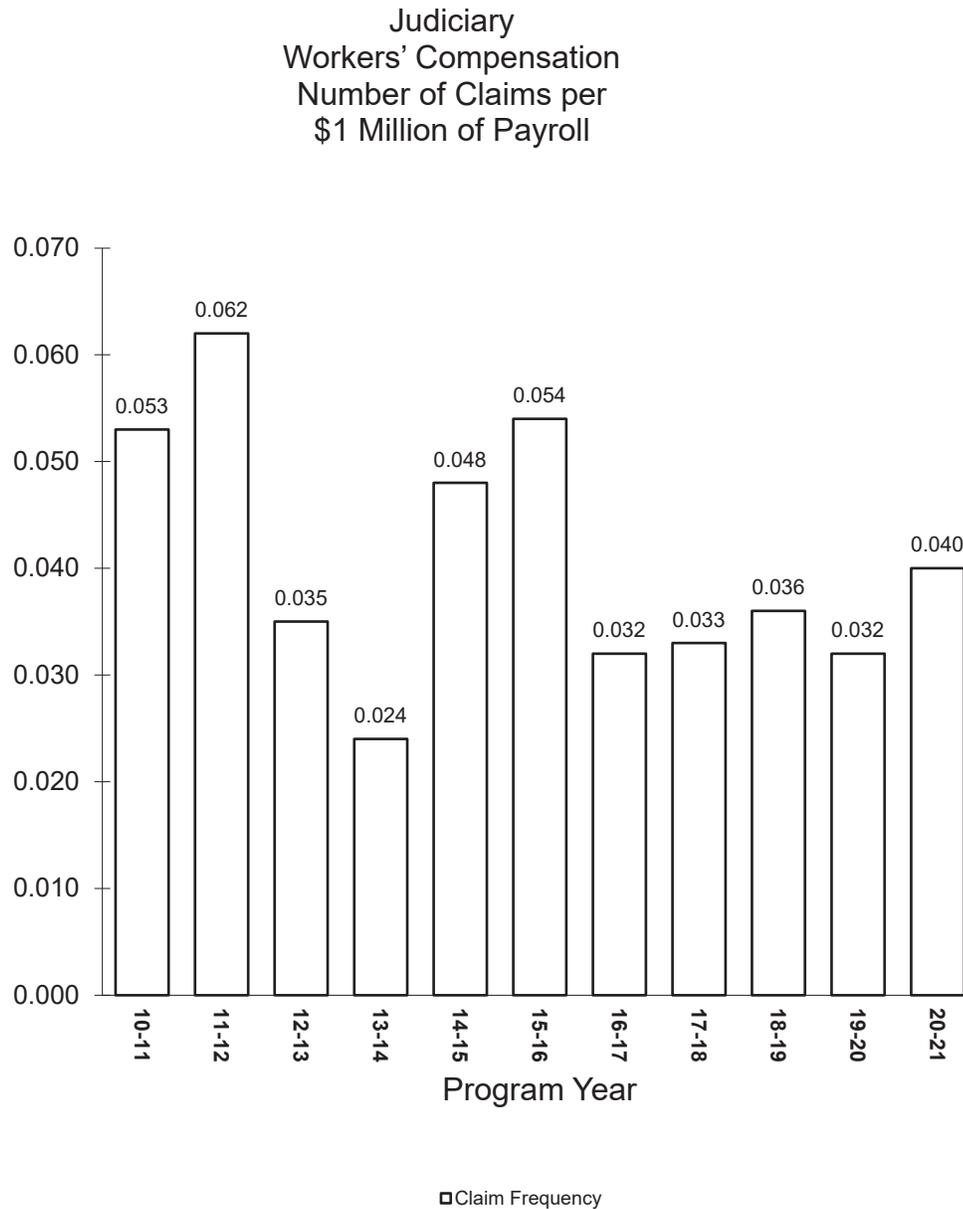

Graph 6

Judiciary  
Workers' Compensation  
Dollars of Loss per Claim

Since 2010-11, the State Judiciary's claim frequency, or number of claims per \$1 million payroll, has ranged from a high of 0.062 in 2011-12 to a low of 0.024 during 2013-14. The projected 2020-21 frequency of 0.040 claims per \$1 million of payroll is based on the average of the most recent five years.

**D. COMPARISON WITH PREVIOUS RESULTS**

The prior report for the Judicial Branch Workers' Compensation Program was dated April 2, 2020. In the following table, we display actual versus expected development of incurred losses and ALAE by accident year for the Trial Courts between the December 31, 2019 evaluation date of the prior report and the December 31, 2020 evaluation date of the current report.

Total	\$13,885,000	\$7,269,000	(\$6,616,000)

As shown, actual incurred development was less than anticipated since the prior report. Based on the assumptions from the prior report, it was expected that incurred losses would increase by \$13,885,000 between the two evaluation dates. However, actual development was approximately \$7,269,000; or about \$6,616,000 less than expected. Most accident years have developed less expected.

In the table below we display actual versus expected development of paid losses and ALAE by accident year for the Trial Courts between the December 31, 2019 evaluation date of the prior report and the December 31, 2020 evaluation date of the current report.

As shown, actual paid development was less than anticipated since the prior report. Based on the assumptions from the prior report, it was expected that paid losses would increase by \$12,540,000 between the two evaluation dates. However, actual development was approximately \$12,077,000; or about \$463,000 less than expected.

In the table below we display the change in the estimates of the program's ultimate losses and ALAE by accident year for the Trial Courts since our prior report.

Total	\$22,337,000	\$21,790,000	(\$547,000)

For the years shown, overall we have decreased the estimated ultimates by \$547,000 since our prior report. The changes in the estimates of ultimate losses generally track with actual versus expected loss development shown in the tables on the previous pages.

At the time of the prior report, the liability for outstanding claims at the expected level as of June 30, 2020 was estimated to be \$71,709,000 for the Trial Courts and \$4,551,000 for the State Judiciary for a total of \$76,260,000. Our current estimate as of June 30, 2021, is \$67,291,000 for the Trial Courts and \$4,153,000 for the State Judiciary for a total of \$71,444,000. These changes in the assessment of the JBWCP's outstanding liabilities for both the Trial Courts and State Judiciary are shown in the following tables:

**Trial Courts Only**  
**Outstanding Claim Liabilities for Loss and LAE**

	Prior Report at June 30, 2020	Current Report at June 30, 2021	Change
(A) Case Reserves:	\$23,353,000	\$19,707,000	(\$3,646,000)
(B) IBNR Reserves:	42,534,000	41,791,000	(743,000)
(C) Claims Administration Reserves:	5,822,000	5,793,000	(29,000)
(D) Total Reserves:	\$71,709,000	\$67,291,000	(\$4,418,000)

**State Judiciary Only**  
**Outstanding Claim Liabilities for Loss and LAE**

	Prior Report at June 30, 2020	Current Report at June 30, 2021	Change
(A) Case Reserves:	\$1,245,000	\$1,033,000	(\$212,000)

(C) Claims Administration Reserves:	918,000	864,000	(54,000)
(D) Total Reserves:	\$4,551,000	\$4,153,000	(\$398,000)

**Trial Courts and State Judiciary Combined**  
**Outstanding Claim Liabilities for Loss and LAE**

	Prior Report at June 30, 2020	Current Report at June 30, 2021	Change
(A) Case Reserves:	\$24,598,000	\$20,740,000	(\$3,858,000)
(B) IBNR Reserves:	44,922,000	44,048,000	(874,000)
(C) Claims Administration Reserves:	6,740,000	6,656,000	(84,000)
(D) Total Reserves:	\$76,260,000	\$71,444,000	(\$4,816,000)

As shown, the estimate of outstanding claims liabilities at the expected level has decreased between June 30, 2020 and June 30, 2021 as reflected in the prior report and current report respectively for both the Trial Courts and State Judiciary.

Since the prior evaluation, case reserves decreased for both the Trial Courts and the State Judiciary. These decreases are coupled with decreases in the estimate of IBNR reserves for the Judiciary. Reserves for future claims administration expenses have decreased. The overall change is a decrease of \$4,816,000 in the estimate of outstanding claim liabilities for loss and ALAE.

Available assets were \$64,620,000 as of June 30, 2020, which corresponded to the then-estimated undiscounted liability for outstanding claims below the expected confidence level. Available assets are currently estimated to be \$71,689,000 as of June 30, 2021, which corresponds to the currently estimated liability for outstanding claims just above the expected confidence level. It can be summarized as follows:

**Funding Margin**

	Prior Report at June 30, 2020	Current Report at June 30, 2021	Change
(A) Outstanding Liability at the Undiscounted Expected Level:	\$76,260,000	\$71,444,000	(\$4,816,000)
(B) Assets At June 30:	64,620,000	71,689,000	7,069,000
(C) Deficit:	(\$11,640,000)	\$245,000	\$11,885,000

As you can see, our estimate of the program's funding deficit at the undiscounted, expected level has increased by \$11,885,000 between June 30, 2020 (as previously estimated) and June 30, 2021 (as currently estimated). This is driven by a decrease in the estimated outstanding liability coupled with by an increase in the estimated fund assets.

At the time of the prior report, the 2020-21 funding projections at the expected level were \$18,267,000 for the Trial Courts. Our current projections for the 2021-22 year are \$17,170,000 for the Trial Courts. The comparison is shown in the following table:

### Comparison of Funding

#### Trial Courts

	Prior Report 2020-21 Retention = \$2M	Current Report 2021-22 Retention = \$2M	Change
(A) Ultimate Loss and ALAE:	\$15,101,000	\$14,021,000	(\$1,080,000)
(B) Ultimate Claims Administration (ULAE):	2,436,000	2,427,000	(9,000)
(C) Total Claim Costs:	\$17,537,000	\$16,448,000	(\$1,089,000)
(D) Offset for Investment Income:	0	0	0
(E) Non Claim Expenses:	730,000	722,000	(8,000)
(F) Total Recommended Funding:	\$18,267,000	\$17,170,000	(\$1,097,000)
(G) Funding per \$100 of Payroll:	\$1.89	\$1.79	(\$0.09)

As you can see, the projected funding for the Trial Courts have decreased and the between 2020-21 and 2021-22, as shown in the prior and current reports respectively.

At the time of the prior report, the 2020-21 funding projections at the expected level were \$1,276,000 for the State Judiciary. Our current projections for the 2021-22 year are \$1,246,000 for the State Judiciary. The comparison is shown in the following table:

### Comparison of Funding

#### State Judiciary

	Prior Report 2020-21 Retention = \$2M	Current Report 2021-22 Retention = \$2M	Change
(A) Ultimate Loss and ALAE:	\$691,000	\$647,000	(\$44,000)
(B) Ultimate Claims Administration (ULAE):	246,000	255,000	9,000
(C) Total Claim Costs:	\$937,000	\$902,000	(\$35,000)

(G) Funding per \$100 of Payroll:	\$0.21	\$0.20	(\$0.01)

As you can see, the projected funding for the State Judiciary have decreased between 2020-21 and 2021-22, as shown in the prior and current reports respectively.

At the time of the prior report, the 2020-21 expected loss and ALAE payments were \$13,099,000 for the Trial Courts and \$553,000 for the State Judiciary, for a total of \$13,652,000. Our current estimates for the 2021-22 year are \$12,305,000 for Trial Courts and \$518,000 for the State Judiciary for a total of \$12,823,000. The comparison is shown in the following table:

**Comparison of Expected Loss and ALAE Payments**

	Prior Report 2020-21	Current Report 2021-22	Change
(A) Trial Courts:	\$13,099,000	\$12,305,000	(\$794,000)
(B) State Judiciary:	553,000	518,000	(35,000)
(C) Total:	\$13,652,000	\$12,823,000	(\$829,000)

As you can see, the expected payments have decreased for the Trial Courts and the State Judiciary between 2020-21 and 2021-22, as shown in the prior and current reports respectively.

The amounts shown above for both ultimates and payments include loss, allocated loss adjustment expenses (ALAE), and payments for 4850 benefits. These amounts do not include unallocated loss adjustment expenses (ULAE), other program expenses or a discount for anticipated investment income.

## **E. DATA PROVIDED FOR THE ANALYSIS**

Overall, the data utilized in preparing this report appears to be accurate.

Comments and issues regarding the data are as follows:

- We have assumed that the program's self-funded retention will remain at \$2,000,000 per occurrence for the Trial Courts for 2020-21, 2021-22, 2022-23, and 2023-24 (See Appendix TC-J for the Trial Courts).
- We have assumed that the program's self-funded retention will remain at \$2,000,000 per occurrence for Judiciary for 2020-21, 2021-22, 2022-23, and 2023-24 (See Appendix J-J for the State Judiciary).
- We received loss data evaluated as of December 31, 2020 (See Appendix TC-K for the Trial Courts and Appendix J-K for the State Judiciary). We also utilized the data from the JBWCP's most recent actuarial study for our assessment of loss development.

The data provided for the analysis appears to be reasonable for use in this actuarial valuation of liabilities and projection of loss costs.

### **III. ASSUMPTIONS AND LIMITATIONS**

Any quantitative analysis is developed within a very specific framework of assumptions about conditions in the outside world, and actuarial analysis is no exception. We believe that it is important to review the assumptions we have made in developing the estimates presented in this report. By doing so, we hope you will gain additional perspective on the nature of the uncertainties involved in maintaining a self-insurance program. Our assumptions, and some observations about them, are as follows:

- Our analysis is based on loss experience, exposure data, and other general and specific information provided to us by the Judicial Council. We have accepted all of this information without audit.
- We have also made use of loss statistics that have been developed from the information gathered and compiled from other California public entities.
- We have assumed that the future development of incurred and paid losses can be reasonably predicted on the basis of development of such losses in the recent past.
- We have made use of cost relationships for claims of various sizes derived from the most recent actuarial review of other California public entities with self-funded workers' compensation programs.
- We have assumed that there is a continuing relationship between past and future loss costs.
- It is not possible to predict future claim costs precisely. Most of the cost of workers' compensation claims arise from a small number of incidents involving serious injury. A relatively small number of such claims could generate enough loss dollars to significantly reduce, or even deplete, the self-insurance fund.
- We cannot predict and have not attempted to predict the impact of future law changes and court rulings on claims costs. This is one major reason why we believe our funding recommendations are reasonable now, but should not be extrapolated into the future.
- The changes in cost levels associated with benefit increases and administrative changes typically take place over a period of several years following their enactment, and these changes are very difficult to forecast in advance. We have based our benefit level factors on those produced by the Workers' Compensation Insurance Rating Bureau of California (WCIRB). See Appendix E for a display of the benefit level cost indices by fiscal year.

## DRAFT

- For the Trial Counts, we have assumed that the loss rate trend associated with claim costs decreases at 0.1% per year. We have assumed that claim severity increases at 2.5% per year, and that claim frequency decreases at 2.5% per year. For the State Judiciary, we have assumed that the loss rate trend associated with claim costs decreases at 2.0% per year. We have assumed that claim severity will remain flat, and that claim frequency decreases at 2.0% per year.
- We have assumed that payroll and other inflation-sensitive exposure measures increase 2.5% annually due to inflation.
- Our funding recommendations do not include provisions for catastrophic events not in the JBWCP's history, such as earthquakes, flooding, mass civil disorder, or mass occupational disease.
- Our estimates assume that all excess insurance is valid and collectible. Further, our funding recommendations do not include a provision for losses greater than the JBWCP's excess coverage.

#### **IV. GLOSSARY OF ACTUARIAL TERMS**

**Accident Year** - Year during which the accidents that generate a group of claims occurs, regardless of when the claims are reported, payments are made, or reserves are established.

**Allocated Loss Adjustment Expenses (ALAE)** - Expense incurred in settling claims that can be directly attributed to specific individual claims (e.g., legal fees, investigative fees, court charges, etc.)

**Benefit Level Factor** - Factor used to adjust historical losses to the current level of workers' compensation benefits.

**Case Reserve** - The amount left to be paid on a claim, as estimated by the claims administrator.

**Claim Count Development Factor** - A factor that is applied to the number of claims reported in a particular accident period in order to estimate the number of claims that will ultimately be reported.

**Claim Frequency** - Number of claims per \$1 million of payroll.

**Confidence Level** - An estimated probability that a given level of funding will be adequate to pay actual claims costs. For example, the 85% confidence level refers to an estimate for which there is an 85% chance that the amount will be sufficient to pay loss costs.

**Discount Factor** - A factor to adjust estimated loss costs to reflect anticipated investment income from assets held prior to actual claim payout.

**Expected Losses** - The best estimate of the full, ultimate value of loss costs.

**Incurred but not Reported (IBNR) Losses** - Losses for which the accident has occurred but the claim has not yet been reported. This is the ultimate value of losses, less any amount that has been set up as reported losses by the claims adjuster. It includes both amounts for claims incurred but not yet received by the administrator and loss development on already reported claims.

**Loss Development Factor** - A factor applied to losses for a particular accident period to reflect the fact that reported and paid losses do not reflect final values until all claims are settled (see Section IV).

**Loss Rate** - Ultimate losses per \$100 of payroll.

**Non-Claims Related Expenses** – Program expenses not directly associated with claims settlement and administration, such as excess insurance, safety program expenses, and general overhead. These exclude expenses associated with loss settlements (Indemnity/Medical, BI/PD), legal expenses associated with individual claims (ALAE), and claims administration (ULAE).

**Outstanding Losses** - Losses that have been incurred but not paid. This is the ultimate value of losses less any amount that has been paid.

**Paid Losses** - Losses actually paid on all reported claims.

**Program Losses** - Losses, including ALAE, limited to the self-funded retention for each occurrence.

**Reported Losses** - The total expected value of losses as estimated by the claims administrator. This is the sum of paid losses and case reserves.

**Self-Funded Retention** - The level at which an excess insurance policy is triggered to begin payments on a claim. Financially, this is similar to an insurance deductible.

**Severity** - Average claim cost.

**Ultimate Losses** - The value of claim costs at the time when all claims have been settled. This amount must be estimated until all claims are actually settled.

**Unallocated Loss Adjustment Expenses (ULAE)** – Claim settlement expenses that cannot be directly attributed to individual claims (e.g., claims adjusters' salaries, taxes, etc.)

- (B) Provided by the Judicial Council. These losses exclude amounts incurred above the Judicial Council's SIR for each year.
- (C) (A) - (B).
- (D) Percentage of incurred but not reported (IBNR) expected to be reported between 1/1/21 and 6/30/21. The percentage is based on the development pattern selected in Appendix TC - A.
- (E) ((A) - (B)) x (D).
- (F) (A) - (B) - (E).

This exhibit shows the calculation of the amount of incurred but not reported losses we expect as of 6/30/21. This amount is dependent on both the strength of the case reserves and the average frequency and severity of the losses incurred.

This exhibit summarizes the results of the actuarial methods we have applied to estimate ultimate losses for each year. It is important to apply a number of estimation methods because each one relies on specific assumptions about the claims process that tend to hold generally true, but that may be violated in specific situations. Thus, the more estimation methods that can be applied, the better.

## Notes:

- (A) Years are 7/1 to 6/30.
- (B) Provided by the Judicial Council. These losses exclude amounts over \$250,000 per occurrence.
- (C) From Appendix TC - A, Page 2.
- (D) (B) x (C). These estimated losses exclude amounts over \$250,000 per occurrence.
- (E) Losses capped at the Judicial Council's SIR. Amounts are provided by the Judicial Council.
- (F) Derived from factors on Appendix TC - A, Page 4.
- (G) (E) x (F).

This method tends to understate ultimate losses for the most recent several years because the large losses for those years generally have not yet emerged at the time of our review.

This exhibit shows the calculation of estimated ultimate losses for each year based on paid losses and case reserves as reported by the claims administrator. These losses tend to "develop" or change from period to period as more information becomes available about the cases. This development tends to follow quantifiable patterns over time.

## Notes:

- (A) Years are 7/1 to 6/30.
- (B) Provided by the Judicial Council. These losses exclude amounts over \$250,000 per occurrence.
- (C) From Appendix TC - B, Page 2.
- (D) (B) x (C). These estimated losses exclude amounts over \$250,000 per occurrence.
- (E) Losses capped at the Judicial Council's SIR. Amounts are provided by the Judicial Council.
- (F) Derived from factors on Appendix TC - B, Page 4.
- (G) (E) x (F).

This method tends to understate ultimate losses for the most recent several years because the large losses for those years generally have not yet emerged at the time of our review.

This exhibit shows the calculation of estimated ultimate losses for each year based on paid losses as reported by the claims administrator. These losses tend to "develop" or change from period to period as more information becomes available about the cases. This development tends to follow quantifiable patterns over time.

This exhibit shows the calculation of ultimate losses based on the assumption that there is an underlying relationship between losses and exposure that changes in regular ways over time. The method relies on the premise that the losses that are currently unreported will cost what this relationship would suggest.

This exhibit shows the calculation of the ways in which we expect claims costs to have changed over the past twenty years due to changes in statutory workers' compensation benefit levels and changes in actual claims costs in excess of changes in payroll. Changes in the ways in which claims are filed as a result of greater awareness of workers' compensation benefits are not generally reflected in the statutory benefit level factors shown above, but may be part of the reason for changes in actual claims costs in excess of payroll changes.

## Payment and Reserve Forecast

Notes to previous page:

- Accident Year is associated with date of loss. Calendar Period is associated with date of transaction. For example, for the losses which occurred during 2018-2019, \$780,692 is expected to be paid between 1/1/21 and 6/30/21, \$5,373,969 will have been paid by 6/30/21, and the reserve for remaining payments on these claims should be \$7,267,675.
- Ultimate Losses for each accident year are from Exhibit TC - 4, Page 1.
- Paid in Calendar Period is a proportion of the Outstanding Liability from the previous calendar period. These proportions are derived from the paid loss development pattern selected in Appendix B. For example,  $\$1,417,197 = \$7,267,675 \times 19.5\%$ .
- Paid to Date is Paid in Calendar Period plus Paid to Date from previous calendar period. For example,  $\$6,791,166 = \$1,417,197 + \$5,373,969$ .
- Outstanding Liability is Ultimate Loss minus Paid to Date. For example,  $\$7,267,675 = \$12,641,644 - \$5,373,969$ .

This exhibit shows the calculation of the liability for outstanding claims as of the date of evaluation, the end of the current fiscal year, and the end of the coming fiscal year. It also shows the expected claims payout during the remainder of the current fiscal year and the coming fiscal year. Refer to the Totals at the end of the exhibit for the balance sheet information. The top parts of the exhibit show information for each program year.

- (C) (A) - (B).
- (D) Percentage of incurred but not reported (IBNR) expected to be reported between 1/1/21 and 6/30/21. The percentage is based on the development pattern selected in Appendix J - A.
- (E) ((A) - (B)) x (D).
- (F) (A) - (B) - (E).

This exhibit shows the calculation of the amount of incurred but not reported losses we expect as of 6/30/21. This amount is dependent on both the strength of the case reserves and the average frequency and severity of the losses incurred.

This exhibit summarizes the results of the actuarial methods we have applied to estimate ultimate losses for each year. It is important to apply a number of estimation methods because each one relies on specific assumptions about the claims process that tend to hold generally true, but that may be violated in specific situations. Thus, the more estimation methods that can be applied, the better.

## Notes:

- (A) Years are 7/1 to 6/30.
- (B) Provided by the Judicial Council. These losses exclude amounts over \$100,000 per occurrence.
- (C) From Appendix J - A, Page 2.
- (D) (B) x (C). These estimated losses exclude amounts over \$100,000 per occurrence.
- (E) Losses capped at the Judicial Council's SIR. Amounts are provided by the Judicial Council.
- (F) Derived from factors on Appendix J - A, Page 4.
- (G) (E) x (F).

This method tends to understate ultimate losses for the most recent several years because the large losses for those years generally have not yet emerged at the time of our review.

This exhibit shows the calculation of estimated ultimate losses for each year based on paid losses and case reserves as reported by the claims administrator. These losses tend to "develop" or change from period to period as more information becomes available about the cases. This development tends to follow quantifiable patterns over time.

## Notes:

- (A) Years are 7/1 to 6/30.
- (B) Provided by the Judicial Council. These losses exclude amounts over \$100,000 per occurrence.
- (C) From Appendix J - B, Page 2.
- (D) (B) x (C). These estimated losses exclude amounts over \$100,000 per occurrence.
- (E) Losses capped at the Judicial Council's SIR. Amounts are provided by the Judicial Council.
- (F) Derived from factors on Appendix J - B, Page 4.
- (G) (E) x (F).

This method tends to understate ultimate losses for the most recent several years because the large losses for those years generally have not yet emerged at the time of our review.

This exhibit shows the calculation of estimated ultimate losses for each year based on paid losses as reported by the claims administrator. These losses tend to "develop" or change from period to period as more information becomes available about the cases. This development tends to follow quantifiable patterns over time.

This exhibit shows the calculation of ultimate losses based on the assumption that there is an underlying relationship between losses and exposure that changes in regular ways over time. The method relies on the premise that the losses that are currently unreported will cost what this relationship would suggest.

This exhibit shows the calculation of the ways in which we expect claims costs to have changed over the past twenty years due to changes in statutory workers' compensation benefit levels and changes in actual claims costs in excess of changes in payroll. Changes in the ways in which claims are filed as a result of greater awareness of workers' compensation benefits are not generally reflected in the statutory benefit level factors shown above, but may be part of the reason for changes in actual claims costs in excess of payroll changes.

## Payment and Reserve Forecast

Notes to previous page:

- Accident Year is associated with date of loss. Calendar Period is associated with date of transaction. For example, for the losses which occurred during 2018-2019, \$33,882 is expected to be paid between 1/1/21 and 6/30/21, \$177,815 will have been paid by 6/30/21, and the reserve for remaining payments on these claims should be \$384,417.
- Ultimate Losses for each accident year are from Exhibit J - 4, Page 1.
- Paid in Calendar Period is a proportion of the Outstanding Liability from the previous calendar period. These proportions are derived from the paid loss development pattern selected in Appendix B. For example,  $\$60,738 = \$384,417 \times 15.8\%$ .
- Paid to Date is Paid in Calendar Period plus Paid to Date from previous calendar period. For example,  $\$238,553 = \$60,738 + \$177,815$ .
- Outstanding Liability is Ultimate Loss minus Paid to Date. For example,  $\$384,417 = \$562,232 - \$177,815$ .

This exhibit shows the calculation of the liability for outstanding claims as of the date of evaluation, the end of the current fiscal year, and the end of the coming fiscal year. It also shows the expected claims payout during the remainder of the current fiscal year and the coming fiscal year. Refer to the Totals at the end of the exhibit for the balance sheet information. The top parts of the exhibit show information for each program year.

To read table: For the above retention, there is a 90% chance that final loss settlements will be less than 1.976 times the average expected amount of losses.

This exhibit shows the loads that must be applied to bring estimated losses at the expected level to the various indicated confidence levels.
