The information in this handout will be used to perform distributions for four (4) case studies. Case information will be gathered real-time and entered onto the respective worksheet for Case 1, as we review the calculations and distribution process. The distribution for the remaining three case studies will be performed in designated virtual breakout rooms, on your own computer, with the help of subject matter experts.

Note: on the TVS worksheet, the surcharge is not included in the subtotal, so subtract that amount when comparing the worksheet to the UB&PS. TVS-specific fees are not included in the UB&PS.

The bail amounts in UB&PS calculation is based on maximum county (\$7/10) and EMS additional penalty (\$2/10). Subtotal and Total Amount in UB&PS will reconcile to worksheet totals **if** the local penalties are assessed at maximum amount.

### **Top-Down Distributions**

### Method 1: prorate "soft" distribution components ONLY.

The case information, base fine, local penalties, and standard and court fees and assessments is prefilled. With this information already input, we can see that the standard total fine is \$234.

- Now, let's assume that based on an ability to pay determination, the judge orders a total fine amount of \$117. Let's see what the top-down distribution will be for a \$117 total fine.
- Enter the total fine ordered in the **yellow highlighted cell**.
- Let's look at the last column within the Top-Down section.

Note that the fixed amounts are whole. That means that after distributing the total fine to these fixed amounts, the remainder is prorated among the remaining fines and penalties. The calculation starts with the total fine, subtracts the fixed amounts, and then uses the remainder as the base for prorating the remainder to the fines, penalties, and state surcharge.

#### Method 2: Prorate ALL distribution components.

- Input the same \$117---total reduced fine ordered by a judge.
- The fixed amounts from the standard distribution are no longer whole. That means that these amounts are also prorated along with the non-fixed fines and penalties. *The math involves using the total fine as the base for prorating the total fine to all the components of the total fine.*
- Note: This is the method that may be applied to ATP cases—
