Report Type

Information

Executive Summary

This informational report to the Judicial Council outlines (1) allocations of facility modification funding made to improve trial court facilities in the fourth quarter (April through June) of fiscal year 2025–26, and (2) a summary of all funding allocations during the fiscal year. To determine allocations, the Trial Court Facility Modification Advisory Committee reviews and approves facility modification requests from across the state in accordance with the council’s *Trial Court Facility Modifications Policy*.

Relevant Previous Reporting or Action

This report is submitted quarterly as required by the Judicial Council’s *Trial Court Facility Modifications Policy* (see Link A).¹ Most recently, on July 17, 2026, the council received the quarterly report for the third quarter of fiscal year (FY) 2025–26 (see Link B). On

¹ Per this policy, each quarterly report includes a list of all facility modifications funded during the quarter, as well as any reallocation of funds between the funding categories (i.e., facility modification priority categories 1–6).

October 24, 2025, the council received the fourth quarter report and *Annual Summary of Facility Modifications for Fiscal Year 2024–25* (see Link C).

Analysis/Rationale

Funding decisions were based on the prioritization and ranking methodologies of the *Trial Court Facility Modifications Policy*. There are six priority categories of facility modifications (FMs):

- Priority 1. Immediately or potentially critical
- Priority 2. Necessary but not yet critical
- Priority 3. Needed
- Priority 4. Does not meet current codes or standards
- Priority 5. Beyond rated life but serviceable
- Priority 6. Hazardous materials, managed but not abated

The current level of funding allows the Trial Court Facility Modification Advisory Committee (TCFMAC) to address only the most critically needed Priority 1 or 2 facility modifications statewide.

FM requests are also reviewed and approved in accordance with the Judicial Council’s *Court-Funded Facilities Request Policy* (see Link D). This policy presents the procedures and requirements to allow trial courts to make court-funded facilities requests (CFRs). Trial courts may assist with the funding of certain facilities costs (e.g., facility modifications and lease-related costs) by contributing funds toward urgent facilities costs—not including capital outlay expenses—through allocation reductions from the Trial Court Trust Fund.

Allowable facilities costs that a trial court can fund through a CFR include (1) FMs as defined in the *Trial Court Facility Modifications Policy*; (2) court operations costs allowable under rule 10.810 of the California Rules of Court, such as equipment, furnishings, interior painting, flooring replacement or repair, furniture repair, and records storage; and (3) lease-related costs, such as lease payments and operating costs, repairs, and modifications authorized by a lease. CFRs are approved by Judicial Council staff, with the following exceptions that require TCFMAC review and approval: ongoing operational cost increases to the Judicial Council beyond the initial outlay for the project (e.g., additional utility or maintenance costs); staff concerns about whether the CFR meets the policy’s criteria or whether the proposed budget is accurate; and appeals of staff determinations.

Fiscal Impact and Policy Implications

Fourth quarter FY 2025–26

During the fourth quarter of FY 2025–26, the TCFMAC reviewed and approved 324 FMs for a total estimated cost of \$18.6 million (see Attachment A). Of these, 195 were Priority 1 FMs and 129 were Priority 2 FMs. The Judicial Council’s Facility Modification Program’s share of the estimated cost was \$16.8 million, with the affected counties responsible for the balance. Most of

these FMs involved repair or replacement of plumbing; elevators; heating, ventilation, and air conditioning (HVAC); fire protection; and interior finishes.

Table 1 presents the distribution by project type for all 324 FMs approved in the fourth quarter of FY 2025–26. Figure 1 shows the sum of the preliminary estimate and the program’s share for each project type. Figure 2 shows the program’s share by the top five project types. Table 2 presents the distribution by county for all 324 FMs, including the preliminary estimate and the program’s share. Attachment A presents the details of each approved FM.

Completed project spotlight

Examples of FM projects completed during the fourth quarter of FY 2025–26 are described below and shown in Figures 3a–3d and 4a–4d.

Priority 1: Plumbing—Clara Shortridge Foltz Criminal Justice Center, Los Angeles County

The irrigation backflow assembly failed due to age, allowing water to flood from the basement down to two floors below including into the exhibits room and surrounding areas. Repairs in the basement mechanical room included replacement of one two-inch irrigation backflow assembly, a relief valve, epoxy waterproof sealer applied to approximately 1,600 square feet of concrete flooring, and installation of 336 linear feet of cove base. In addition, approximately 460 square feet of flooring was replaced in the S-Level fan room. All affected interior spaces received environmental remediation within three containment areas, including the cleaning, drying, and sanitizing of approximately 25 square feet of concrete ceiling, one light fixture, 10 linear feet of piping, four file cabinets, and 195 square feet of concrete flooring on the P-Level. The final project cost was \$138,514.

Priority 1: Plumbing—Hayward Hall of Justice, Alameda County

A blockage in the sewer line from root intrusion of exterior landscaping caused sewage to back up into the building's first floor. Repairs included unclogging the first-floor drains, excavating the affected area, and replacing approximately 10 linear feet of four-inch sewer pipe. Also, to prevent future backup while improving maintenance access, two one-way directional cleanouts were installed. All affected interior spaces exposed to Category 3 black water received environmental remediation including the cleaning, drying, and sanitizing approximately 1,220 square feet of vinyl composition tile flooring and the removal and replacement of approximately 176 square feet of carpet. The final project cost was \$65,198.

Annual summary

In FY 2025–26, TCFMAC priorities included the following (see Link A for definitions of these FM priorities):

- \$69.9 million was the Judicial Council’s share for 1,665 Priorities 1 and 2 projects (see Tables 3, 4, and 5 and Attachments C and D). These projects were funded as follows:
 - \$30.1 million was spent on 927 Priority 1 projects; and
 - \$39.8 million was spent on 738 planned and unplanned Priority 2 projects;
- \$18 million was for secondary project phases and cost increases;
- \$1 million was to support statewide FM planning (i.e., project management functions and preliminary project planning and estimating); and
- \$22.2 million was self-funded by trial courts on a total of 51 CFR projects.

In FY 2025–26, 1,584 Priorities 1 and 2 FMs were completed (see Table 3 and Attachment D).

Figure 3 presents the distribution by project type of all 1,584 FMs completed in FY 2025–26. Also shown is the total cost and Judicial Council share of each project type. In Attachment D of this report, Attachment D-III presents the details of each completed FM.

Figure 4, below, shows how funding of the priority categories has changed since FY 2013–14. Need has continued to outweigh funding, and funded projects have been limited to those in priority categories 1 and 2, with only a small percentage in category 3. Figure 4 also represents the breakdown of dollars spent by priority category, expressed as a percentage of the FMs funded during each fiscal year. The line represents the growth over time in square footage for which the Judicial Council has responsibility. Funding has not kept pace with square footage responsibility.

Figure 4. Funded Facility Modifications by Priority Category*

* Sq. Ft. and SF = square feet.

Trial courts can self-fund projects through the CFR Program administered by Judicial Council staff. Funded by the trial courts in FY 2025–26 were 51 CFR projects totaling \$22.2 million: 46 FM-related projects with a total estimated cost of \$19.7 million, and five non-FM-related requests for leases with a total estimated cost of \$2.5 million.

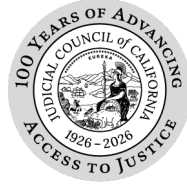

In FY 2018–19, the FM Program received one-time additional funding for deferred maintenance from the state General Fund in the amount of \$50 million. Of these funds, \$5 million was applied to facility assessments, which have been completed, and \$45 million was applied to replace roofs, elevators, and wheelchair lifts and to upgrade building automation systems (BAS). A total of 27 projects have been completed including a statewide assessment.

In FY 2019–20, one-time funding of \$15 million for deferred maintenance was received from the state General Fund. These funds have been applied to fire alarm systems and protection projects, of which nine have been completed and one is in construction (see Attachment D-IV).

In FY 2021–22, one-time funding of \$180 million for deferred maintenance was received from the state General Fund. The Governor’s Budget for FY 2023–24 reduced this funding due to a decline in state revenue, resulting in a new total of \$132.6 million. These funds have been applied to replace roofs and elevators and to upgrade fire protection, electrical, and HVAC systems, and building management systems (BMS). A total of 44 projects have been completed, five are in construction, and four are in close-out (see Attachment D-IV). Also, a total of 67 projects have been identified but require additional funding to implement.

Annual Summary of Facility Modifications for Fiscal Year 2025–26 (DRAFT)

October 15, 2026

Judicial Council of California

Trial Court Facility Modification
Advisory Committee

Executive Summary

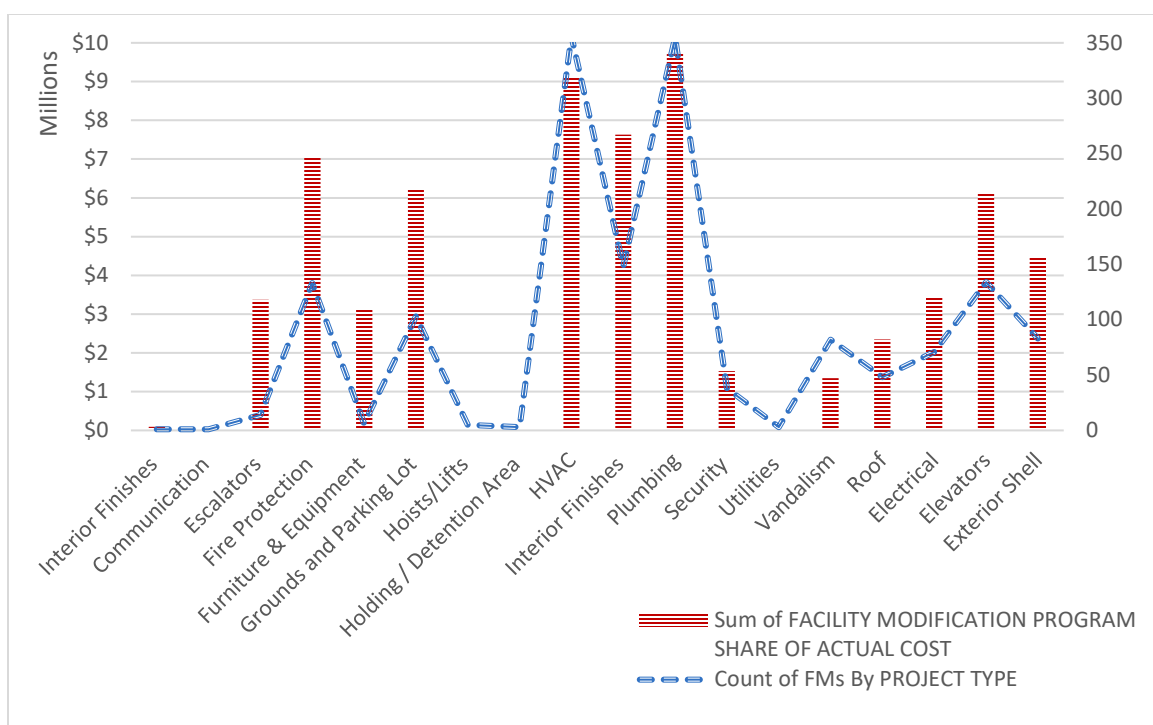

The Trial Court Facility Modification Advisory Committee (TCFMAC) reviews and approves facility modification (FM) requests from across the state in accordance with the Judicial Council's *Trial Court Facility Modifications Policy* (see Link A). As required annually by the policy, the final quarterly report for each fiscal year (FY) also includes the annual summary of facility modifications. Examples of significant completed FMs are presented in Attachment D-I. In FY 2025–26, TCFMAC priorities included the following:

- \$69.9 million was the Judicial Council's share for 1,665 Priority 1 and 2 projects (see Table 1 and Attachment D-II). These projects were funded as follows:
 - \$30.1 million was spent on 927 Priority 1 projects; and
 - \$39.8 million was spent on 738 planned and unplanned Priority 2 projects;
- \$18 million was for secondary project phases and cost increases;
- \$1 million was to support statewide FM planning (i.e., project management functions and preliminary project planning and estimating);
- \$22.2 million was self-funded by trial courts on a total of 51 court-funded facilities request (CFR) projects.

In FY 2025–26, 1,584 Priority 1 and 2 FMs were completed.

Figure 1, below, presents the distribution by project type of all 1,584 FMs completed in FY 2025–26. Also shown is the total cost and Judicial Council share of each project type. Attachment D-III presents the details of each completed FM.

Figure 1. All Facility Modifications Completed in FY 2025–26

Trial courts can self-fund projects through the CFR Program administered by Judicial Council staff. Funded by the trial courts in FY 2025–26 were 51 CFR projects totaling \$22.2 million: 46 FM-related projects with a total estimated cost of \$19.7 million, and five non-FM-related requests for leases with a total estimated cost of \$2.5 million.

In FY 2018–19, the FM Program received one-time additional funding for deferred maintenance from the state General Fund in the amount of \$50 million. Of these funds, \$5 million was applied to facility assessments, which have been completed, and \$45 million was applied to replace roofs, elevators, and wheelchair lifts and to upgrade building automation systems (BAS). A total of 27 projects have been completed including a statewide assessment.

In FY 2019–20, one-time funding of \$15 million for deferred maintenance was received from the state General Fund. These funds have been applied to fire alarm systems and protection projects, of which nine have been completed and one is in construction (see Attachment D-IV).

In FY 2021–22, one-time funding of \$180 million for deferred maintenance was received from the state General Fund. The Governor’s Budget for FY 2023–24 reduced this funding due to a decline in state revenue, resulting in a new total of \$132.6 million. These funds have been applied to replace roofs and elevators and to upgrade fire protection, electrical, and HVAC systems, and building management systems (BMS). A total of 44 projects have been completed, five are in construction, and four are in close-out (see Attachment D-IV). Also, a total of 67 projects have been identified but require additional funding to implement.

The current level of funding for FMs is insufficient to address needs statewide. The TCFMAC could not fund all needed FMs in FY 2025–26, as reflected in the *Five-Year Deferred*

Maintenance Report for Fiscal Year 2025–26 (see Link B) submitted to the Department of Finance. The current level of funding allows the TCFMAC to address only the most critically needed Priority 1 and 2 (and some Priority 3) FMs statewide.

These FMs have all reached a level of critical need requiring immediate attention, such as roof replacements, elevator renovations, and the replacement of cooling towers and chillers to restore basic building functions. Lower-priority (Priority 4–6) projects—such as FMs for replacement of interior finishes, security enhancements, and painting of building interiors and exteriors—will continue to be deferred until they reach a level of critical need.

Funding Sources and Restrictions

The FM Program is funded from three sources:

- State Court Facilities Construction Fund, combined with the Immediate and Critical Needs Account created by Senate Bill 1407 (Perata; Stats. 2008, ch. 311);
- Court Facilities Architecture Revolving Fund, established as a depository for the transfer of money for construction, repair, alteration, and improvement of both trial and appellate court buildings; and
- Reimbursable funds, to cover a county’s share of FM costs in shared-use facilities.

Significant Expenditures in FY 2025–26

Contractors for both the Judicial Council and the counties performed 1,665 FMs in FY 2025–26 (see Attachment D-II), for a total combined cost of \$69.9 million. Most of these FMs had a total cost of less than \$50,000. Of the 1,665 FM projects, 33 had costs over \$300,000, totaling approximately \$34.7 million (see Attachment D-V).

Advisory Committee Activities

Asbestos management policy. At its meeting on December 3, 2018, the TCFMAC recommended approval of the *Judicial Council Policy on Asbestos Management for Court Facilities* (see Link C). Subsequently, at its meeting on December 13, 2018, the Judicial Council’s Executive and Planning Committee adopted this policy on behalf of the Judicial Council.

Facility modifications review and funding. Using the FM ranking methodology provided in the FM policy, Judicial Council staff prepare a preliminary ranking list of all submitted FMs for the TCFMAC to review. The TCFMAC reviews, revises, and finalizes this list for use when considering which FMs to fund. Table 1 outlines the activities of the TCFMAC in FY 2025–26, indicating the number of FMs reviewed and approved, funded and open, and completed (also see Attachments D-II and D-III).

Table 1. Facility Modification Activity in FY 2025–26

† Includes all facility modifications completed during FY 2025–26, regardless of the year of funding.

A summary of FM funding in FY 2025–26 by priority and by court approval is provided in Attachment D-II. Most of the funding was dedicated to Priority 1 FMs.

Figure 2 shows how funding of the priority categories has changed since FY 2013–14. Need has continued to outweigh funding, and funded projects have been limited to those in priority categories 1 and 2, with only a small percentage in category 3. Figure 2 also represents the breakdown of dollars spent by priority category, expressed as a percentage of the FMs funded during each fiscal year. The line represents the growth over time in square footage for which the Judicial Council has responsibility. Funding has not kept pace with square footage responsibility.

Operations and Maintenance

The TCFMAC oversees court facility maintenance and repairs that must be performed periodically throughout the life of a facility to keep the building, equipment, and utilities infrastructure in a condition adequate to support its designed level of service. Broad oversight of the entire existing facility management program under one advisory committee helps ensure that the various aspects of the program are coordinated and are as cost-effective as possible. In early 2023, the Judicial Council entered into contracts with service providers for maintenance and repair activities with an annual budget of \$80 million. Performance of the service providers is being evaluated monthly to ensure performance. Performance data is shared with the TCFMAC. Three courts—in Imperial, Orange, and Riverside counties—continue to perform maintenance repairs through delegation from the Judicial Council.

Court Facilities Trust Fund (CFTF). In 2002, the CFTF was established by the Trial Court Facilities Act (Sen. Bill 1732; Stats. 2002, ch. 1082, and subsequent modifying language) to fund the ongoing operations, repair, and maintenance of trial court facilities transferred from the counties to the state. Through December 2009, more than 500 trial court facilities transferred to the Judicial Council, along with the responsibility to fund ongoing operations, repair, and maintenance costs. The act requires each county that transferred trial court facilities to pay a county facility payment (CFP) to the state.

The CFP was determined by the amount the county had expended historically on court facilities operations and maintenance (O&M), with the intent that needed funding exceeding the CFP be provided by the state through future state General Fund augmentations. Significant supplemental funding was last provided from the state General Fund in FY 2010–11. Over time, and to address revenue shortfall, O&M has been cut to extremely low levels, while utility costs have increased statewide at a pace faster than inflation.

The CFTF is the only fund available to pay the costs of ongoing O&M of trial court facilities. Its primary revenue source is CFPs. CFPs constitute approximately 80 percent of the fund's revenue, with the balance coming from other sources, such as rental of court facilities and parking. Almost 90 percent of the CFTF expenditures fund utilities (e.g., electricity, gas, water, and sewer) and ongoing maintenance, with the balance used to pay for leases and insurance.

In FY 2025–26, three new capital projects were completed, and four others were under construction. With new projects being completed, additional funding for O&M will be required, and the Judicial Council is submitting Budget Change Proposals (BCPs) for additional funding.

Judicial Council staff collaboratively worked with the trial courts to implement a series of conservation and energy-efficiency strategies, including:

- Implementing energy-efficient lighting and HVAC projects;
- Controlling plug load;
- Tracking and reporting utility cost and usage; and
- Assisting the trial courts with the implementation of updated energy conservation guidelines adopted by the Judicial Council in September 2017.

Sustainability Plan

Sustainability Plan for Trial Court Facilities. In 2020, the TCFMAC adopted a broader approach to energy efficiency and conservation, passing the *Sustainability Plan for Trial Court Facilities* (see Link D), which targeted both new and existing facilities for greener operations.

The plan identified strategies to assist with the implementation of Goal 1, such as pursuing alternative financing options for energy-efficiency initiatives; communicating behavioral changes that could save energy, natural resources, and money; establishing a reliable data tracking system to enable accurate measurement of usage and cost; and improving power resiliency through onsite energy generation and storage systems. For existing buildings, Goal 1 intends to reduce greenhouse gas emissions, energy usage, and utility costs, and to conserve natural resources.

The Judicial Council Facilities Services' Sustainability Unit continues to focus on improving energy efficiency, conserving water, minimizing waste, implementing renewable energy sources, installing electric vehicle (EV) charging infrastructure, and improving visibility and communication of facilities performance. Significant achievements and ongoing efforts are described below.

Implementing solar systems statewide through a Power Purchase Agreement. The primary goals of this initiative are to establish pricing stability with onsite energy, prevent disruption to court services during utility power outages, and reduce greenhouse gas emissions related to electricity. Cost-effective pricing was secured for 20 sites, and staff continue to explore alternative strategies for additional sites in the future. These solar systems are expected to generate over 16 megawatt hours (MWhs) of electricity annually and provide reductions of approximately 2,452 metric tons of carbon dioxide equivalent (MTCO_{2e}) in the first year, 3.3 percent less than the baseline of 73,933 MTCO_{2e}. Contracts have been executed, and staff have been working with the two contractors on finalizing the designs for permit approval. The systems are targeted for operation by the second quarter of 2027. Quarterly reports to the TCFMAC will provide progress of this program.

Electric vehicle charging infrastructure. In January 2022, the TCFMAC approved plans for public-facing EV chargers at disadvantaged communities in Los Angeles County: Compton (24 charger ports), El Monte (38 charger ports), and Pomona (40 charger ports). Although completion of these projects has been significantly delayed, the Compton and El Monte locations are expected to have operational chargers by the end of 2026. The Southern California Edison redesign of the Pomona project has introduced a further delay, and it is now expected to be operational in 2027.

Energy efficiency. During FY 2025–26, two consultant studies progressed:

1. The *Deep Energy Retrofit Study* to evaluate strategies for significantly improving the energy performance at the 20 long-range portfolio facilities with the worst energy performance in calendar year 2021. Following the review of the preliminary reports, staff have requested additional analysis from the consultant to ensure that the future mandatory move away from

combustion appliances is adequately evaluated for planning and funding purposes. Intended completion by the third quarter of FY 2026–27.

2. The *California State-Managed Courthouses Energy Efficiency Strategy Study* evaluated energy efficiency goals for state-managed courthouses, focusing on capital outlay, renovation, and maintenance to propose achievable goals and provide cost estimates. The study concluded in the last quarter of FY 2025–26, and the final report includes recommendations for both the capital outlay program and the existing buildings portfolio, which establishes energy use intensity (EUI) targets for new courthouses by California climate zone and building size category. Each new courthouse project must perform project-specific energy modeling to demonstrate compliance with its target at the design stage, with performance tracked through occupancy, giving the council a consistent, portfolio-wide method to evaluate energy performance across facilities and climate zones. The recommendations are expected to be incorporated into the *California Trial Court Facilities Standards, 2026 Edition*.

Energy Use Intensity Reduction Project: When utility costs began exceeding projections, the Judicial Council responded with a strategic internal review of courthouse energy performance. This resulted in the initiation of the EUI Reduction Project, starting with the “Focus 6.” With the success of Focus 6, an additional six facilities were added to the project. The Group 2 facilities were selected with a focus on large square footage (i.e., greater than 100,000 square feet), functional and remotely accessible Direct Digital Control BMS system, and reasonable potential for energy and cost savings with minimal interventions. Table 2 and Figures 3 and 4 show the avoided cost over three years through no-cost operational improvements.

* Site Energy Use Intensity (EUI) is a metric that measures the amount of energy consumed by a building per unit of floor area over a specific time period, which is typically expressed as thousand British thermal units per square foot per year (kBtu/ft²/year). Site EUI reflects the energy delivered to and consumed at the building site, including electricity, natural gas, and other fuels; but it does not account for the energy losses that occur during electricity generation and transmission. This metric is commonly used to benchmark building energy performance and compare efficiency across similar building types.

† Cost savings through the end of calendar year 2025 are included here. The Group 2 savings are included starting in 2024.

By targeting buildings with high potential for optimization, this initiative delivers measurable benefits, including reduced energy consumption, lower utility costs, and improved services for courthouse users and visitors. To ensure lasting improvements in energy performance, updates have also been proposed for the *California Trial Court Facilities Standards, 2026 Edition*. Judicial Council Facilities Services also plans to increase collaboration with individual courts and other offices of the Judicial Council to further align initiatives and maximize overall impact.

Building Management System Improvement Project. With the allocation of deferred maintenance funding in FY 2021–22, Judicial Council Facilities Services launched a strategic initiative to modernize building management systems across the Judicial Council–owned building portfolio. Figure 5 below presents the energy savings from BMS upgrades across 15

buildings, based on a comparison of electricity and gas use for 2023 and 2025. These energy savings of nearly 25.5 million kBtu, have resulted in an estimated avoided cost of roughly \$700,000 in 2025. Additionally, Riverside–Larson Justice Center, Los Angeles–Pomona Courthouse South, and Orange–Stephen K. Tamura Courthouse have or will soon complete BMS upgrades.

Facilities performance and stakeholder education. Monthly energy and water consumption reports have continued to improve the visibility of court facilities performance and stakeholder education. The state-managed portfolio-wide energy, water, and greenhouse gas emissions metrics for 2025 will be presented to TCFMAC in October 2026.

Since its launch in July 2022, the Sustainability Partnership, a quarterly virtual forum with court liaisons, has been well attended by 22 trial courts, three appellate districts, and three service providers. Sustainability updates, educational components, and presentations by court guest speakers are provided.

Funding Concerns and Outlook

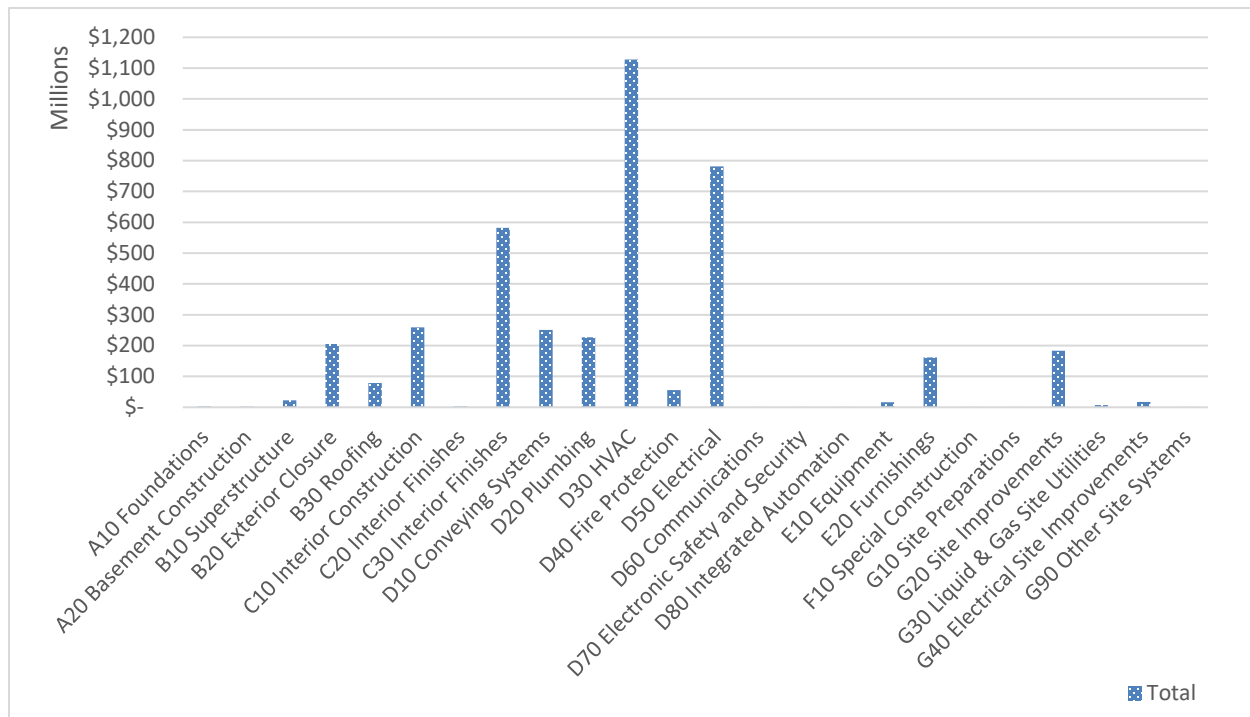

Because need exceeds O&M funding, Judicial Council staff maintain facilities in a run-to-failure environment that focuses exclusively on projects that respond to failed building systems. This run-to-failure environment results in otherwise avoidable disruptions to court operations because needed renewals of building systems are not timely performed. Court operations are affected by issues such as HVAC system failures, electrical service outages, and facility closures resulting from water leaks. Without an adequate O&M budget to perform preventative maintenance, these critical systems will continue to fail, interrupt court operations, and limit the public's access to justice.

These projects are a priority to maintain continuity of court operations in facilities throughout the state. Examples of these critical system replacements that place the public's safety at risk in court facilities include but are not limited to the following:

- Failed roofing systems causing interior structural damage;
- Failed fire protection monitoring systems causing safety issues;
- Failed elevator systems causing entrapments;
- Failed HVAC equipment causing uncomfortable or unsafe respiratory conditions; and
- Failed plumbing systems causing flooding.

Figure 6 presents the costs of unfunded, needed projects by building system.

Figure 6. Identified Requests by Building System*

* Costs as of June 30, 2026. Building system coding aligns with UNIFORMAT II principles as set by the National Institute of Standards and Technology—NISTIR 6389.

Obtaining adequate funding continues to challenge the Judicial Council and its TCFMAC as it implements the council’s FM Program and funds facilities O&M. However, the council and its TCFMAC continue to complete as much work as possible on existing facilities with available funding.

1. Priority 1: Vandalism—Clara Shortridge Foltz Criminal Justice Center, Los Angeles County

Due to civil unrest, multiple exterior areas of the justice center were damaged in the form of broken windows, graffiti, and debris. Repairs included the replacement of nine exterior glazing panels (one 57 by 102 inches, one 57 by 101 inches, one 57 by 101¾ inches, two 34 by 57 inches, one 57 by 145 inches, one 57 by 101⅞ inches, one 56 by 102 inches, and one 48 by 60 inches) and the removal of debris and 605 linear feet of graffiti.

The final project cost was \$171,187.

After

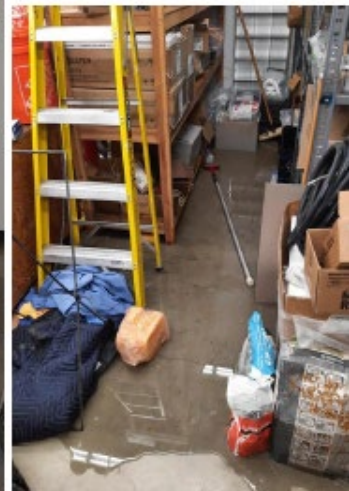

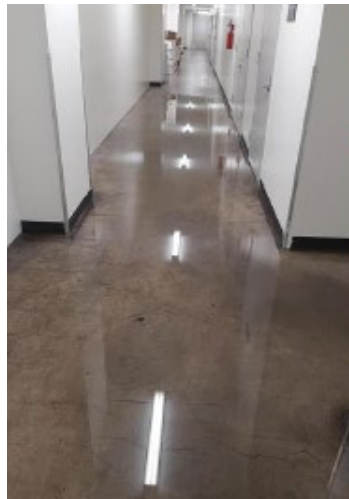

2. Priority 1: Plumbing—Edmund D. Edelman Children’s Courthouse, Los Angeles County

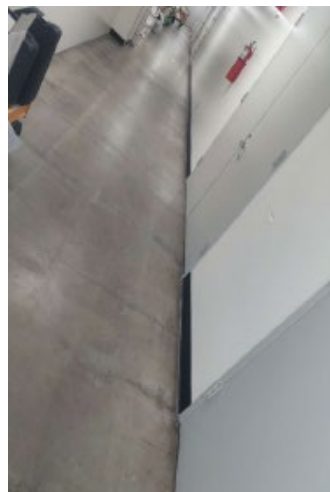

Due to a faucet handle in the basement’s engineering shop failing from age, water ran throughout the weekend, flooding the shop and adjacent spaces. Repairs included environmental remediation and replacement of the failed faucet and 250 square feet of drywall, 134 square feet of three-inch cove base, 200 linear feet of four-inch cove base, and 30 square feet of vinyl floor tile located throughout the engineering shop, secure hallway, cafeteria, and janitor’s office. Cleaned, dried, and sanitized were 2,100 square feet of concrete flooring, 890 square feet of drywall, 190 square feet of carpet, 325 square feet of vinyl floor tile, 300 square feet of maintenance supplies, and a total of 38 desks, lockers, and file cabinets.

The final project cost was \$ 133,782.

After

3. Priority 1: Plumbing—Van Nuys Courthouse West, Los Angeles County

The drain line failed due to age and deterioration, resulting in water intrusion into the courtrooms. Remediation included replacement of the damaged drain line components, including three 4-inch no-hub fittings, two 4-inch x 2-inch combination fittings, two 4½-inch bend fittings, one ¾-inch bend fitting, one 3-inch x 2-inch tee fitting, one 3⅝-inch bend fitting, one 4-inch x 3-inch fitting, ten 4-inch couplings, six 2-inch couplings, and eight 3-inch couplings. Remediation also included replacement of water-damaged finishes in three fifth-floor courtrooms, including 42 square feet of 1-foot x 1-foot ceiling tiles, 200 square feet of carpet, and 70 square feet of drywall.

The final project cost was \$ 107,065.

Before

After

4. Priority 1: Plumbing—Hayward Hall of Justice, Alameda County

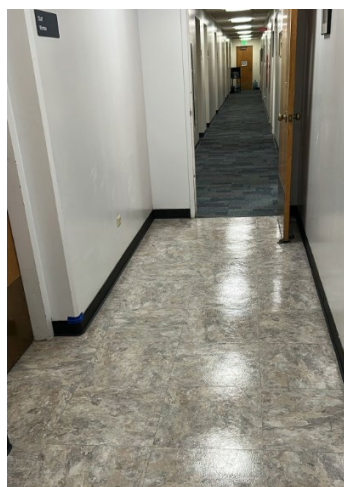

A sewer line leak resulted in a sewage backup on the first floor due to root intrusion in the exterior landscape, which obstructed the sewer line. Corrective work included unclogging the first-floor drains, excavating the affected area, and replacing approximately 10 linear feet of 4-inch sewer pipe. To improve future maintenance access and help prevent additional backups, two (2) one-way directional cleanouts were installed. Water remediation activities included removing Category 3 (black water) contamination from approximately 176 square feet of carpeting and cleaning and sanitizing approximately 1,220 square feet of vinyl composition tile (VCT) flooring.

The final project cost was \$ 65,198.
